Contact Us

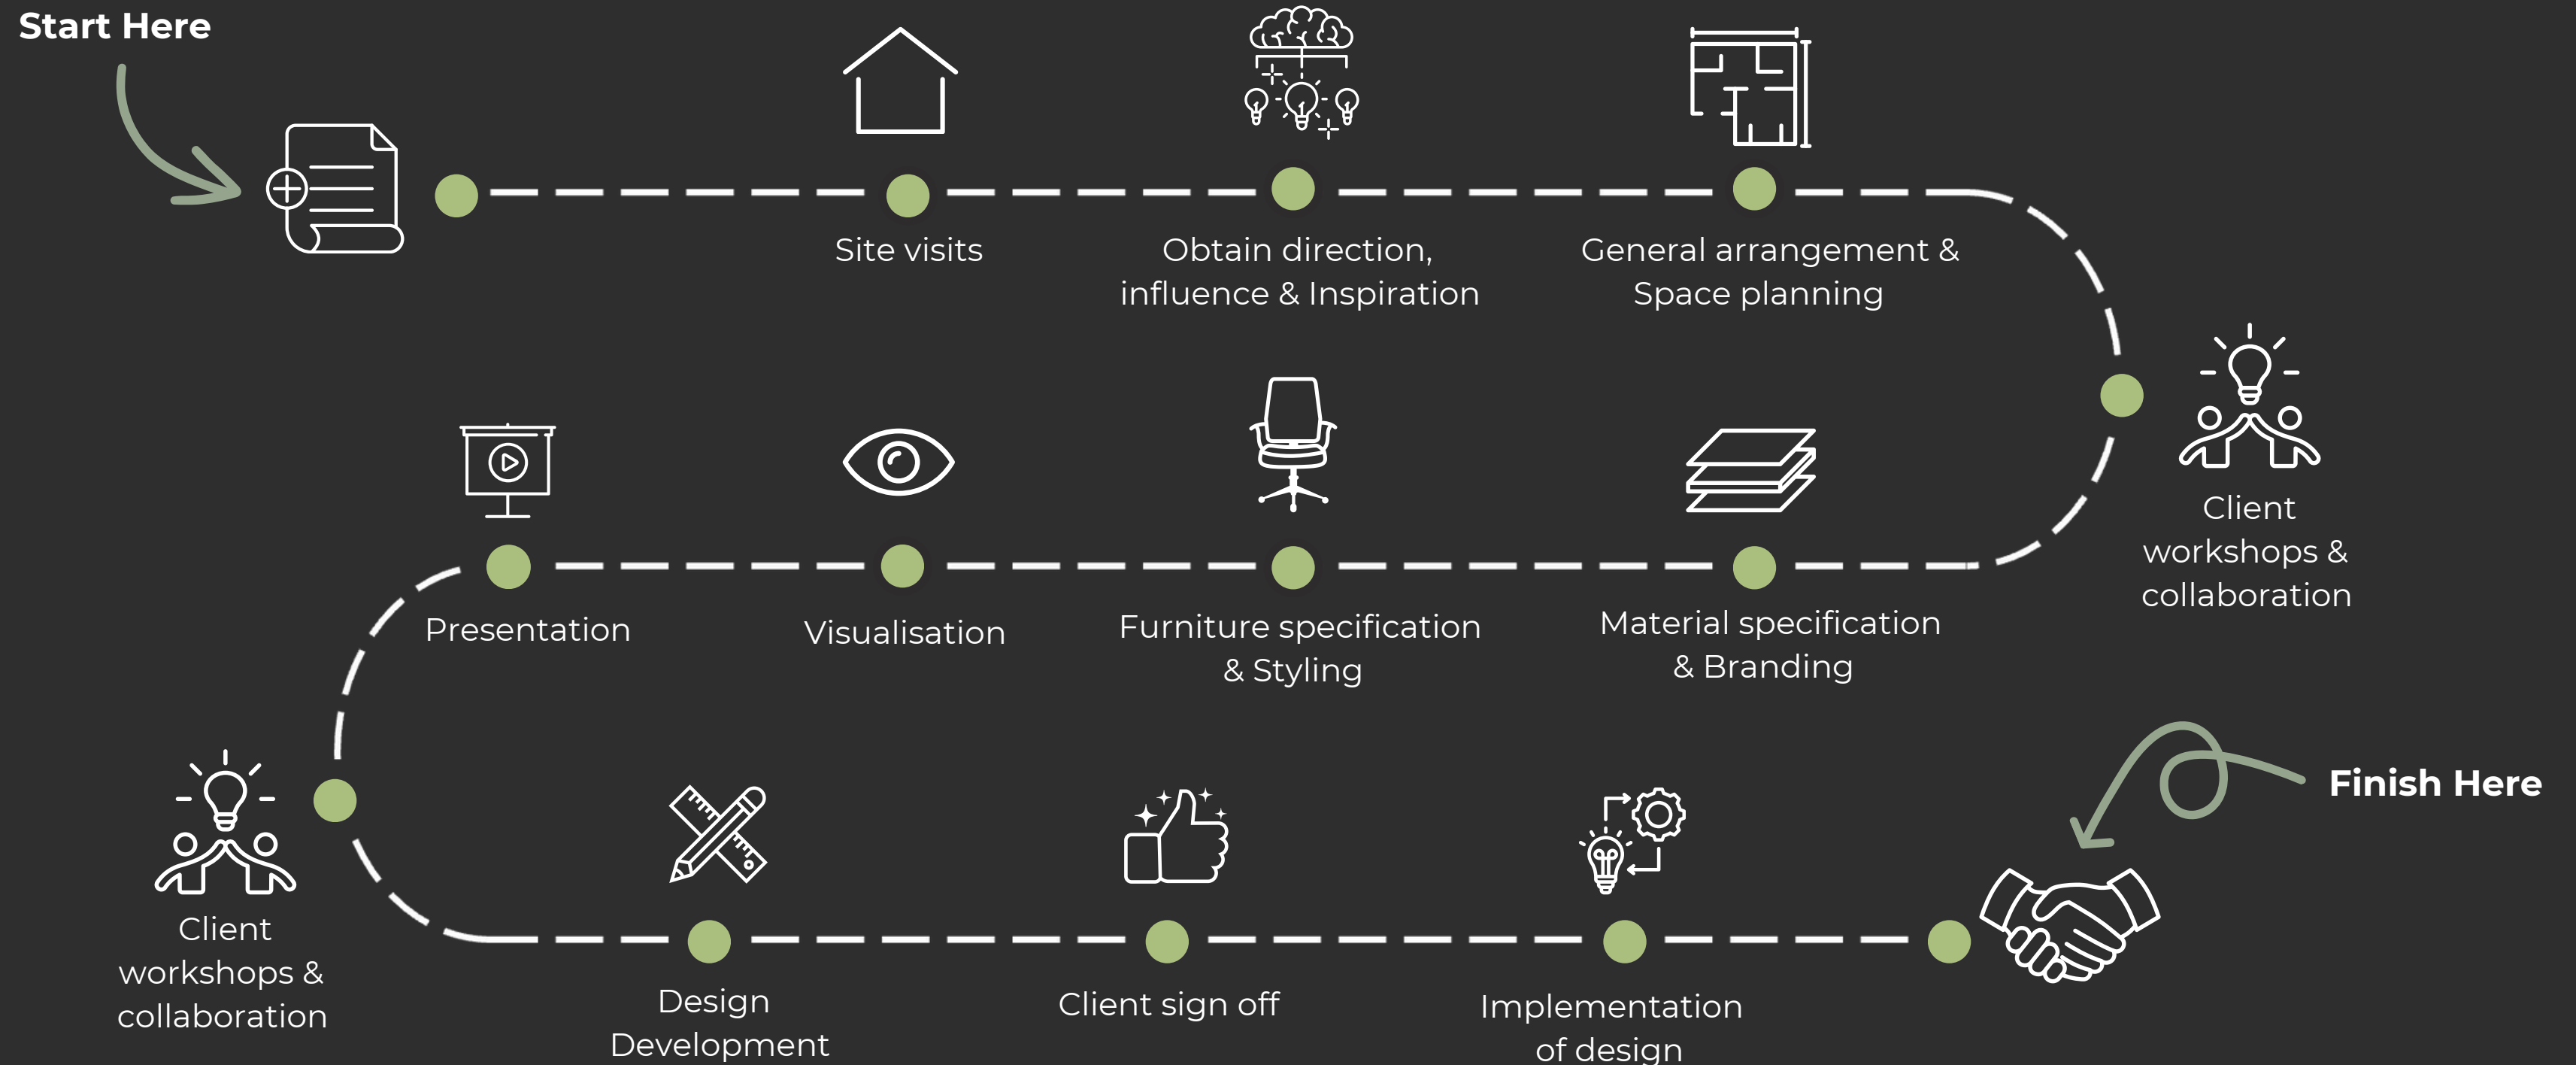

Defurb Interior Design Studio is a full interior design practice.

Founded in 2019 Defurb was born out of a desire to create and deliver immersive experiences whether in a workplace hospitality or residential environment.

Acting as interior consultants our team collaborate with contractors, architects, suppliers and project managers to deliver from concept to construction.

We make **sustainable** choices. We minimise our impact by designing with longevity in mind, sourcing responsible materials and use as many local suppliers as possible.

“Defurbs creativity, knowledge and experience made it a pleasure to work together on this project. The time invested at the beginning by Lesley to understand our culture through the design workshops and how the teams worked was invaluable to a successful project.

Defurb were also chosen to design our London office and the design principles created in our Manchester office are now applied to all our global offices.”
